

## Truck Sideslip Tester

Today, time is money. Did you ever spent more than an hour to finish Aligner Testing, only to find out that you don't need do that? Our Sideslip Tester only need 5 seconds for you to decide whether you need Wheel Aligner test or not. It can test the comprehensive degree of the deviation. If the testing result is out of the normal range, then we need the Wheel Aligner to judge the main cause.

### ★ Measurement Items

Sideslip (mm)

- ★ Single sideslip tester with relax plate can decrease the pulling force, making the sequence more accurate.
- ★ With high sensitivity displacement sensors, can increase the veracity of the testing result.

## RSS-700 Sideslip Tester

Item	Parameter
Axle Load	10T
Testing Speed	5-10 km/h
Testing range	±15mm
Testing Plate Length	1000mm
Dimensions(L*W*H)	800*460*60mm

Item	Parameter
Axle Load	10T
Testing Speed	5-10 km/h
Testing range	±15mm

Shanghai Jevol Electromechanical Equipment Co., Ltd.  
Room 1101, Building 1, No. 801 Huiping Road,  
Jiading District, Shanghai, China
